

GeoNode

Is a platform for the management and publication of geospatial data. It brings together mature open-source software projects under an easy to use interface. With GeoNode, non-specialized users can share data and create interactive maps.

GEONODE IS MADE FOR

Users

who log into a GeoNode website and use its functionality.

Administrators

who install and deploy GeoNode websites in production for their Users.

Developers

who write code to add functionality, integrate with other systems, fix bugs, and potentially help an Administrator setup a server and deploy a GeoNode instance for production.

MANAGEMENT AND PUBLICATION OF GEOSPATIAL DATA
